

A group of four people are gathered around a wooden table in a meeting. On the left, a man with a beard and a bun is looking at a laptop. In the center, a man with glasses is holding a pen and looking towards the right. On the right, a man in a light blue shirt is looking towards the center. In the foreground, the back of a woman's head is visible as she looks towards the group. The table is cluttered with laptops, papers, a red coffee cup, and a white coffee cup. The background features a grey wall with several circular wooden decorations and a whiteboard with some faint writing.

2020 Salary Guide

Our mission is to connect employers with the creators and visionaries who bring tomorrow's technology to life.

We do it by delivering on our promises:

Quality, Transparency, and Results.

QTR has been bringing businesses and people together, creating rewarding connections since 1968. As a member of the Quantum Group, QTR is an award-winning firm dedicated exclusively to recruitment in the technology and engineering verticals. Serving the greater Toronto, Ottawa, Montreal, and Quebec City areas, our experts are well entrenched in our local markets and have a in-depth understanding of our clients' technological environments.

Our 2020 Salary Guide provides current market rates and salaries for core IT positions.

While some uncertainty in the market remains due to the arrival of COVID-19, IT remains particularly strong in several areas, including support, network and security, automation, and Cloud computing. Taking this into account, the rates and salaries herein represent our recommended figures to stay competitive in the market and to promote attraction and long-term retention.

Please note that these figures are a succinct and strong representation, but not exact for everyone - compensation will depend on organizational size, budget, funding, and various attraction elements provided to employees (e.g. bonuses, health benefits, stock plans, equity, pensions, etc.) These elements provide immense value to overall compensation packages and should be taken into account when determining base salary figures.
